

## Hospitality – Health Safety

### Beachcomber partners with LIBA to introduce the SAFE PLACE label for its hotels

Beachcomber Resorts & Hotels is gearing up for the post-COVID-19 recovery phase and reopening of its resorts with a **SAFE PLACE** label which the Group has developed for its eight hotels in Mauritius. The initiative stems from a partnership with LIBA, an ISO 17025 accredited international bioanalytical laboratory that already carries out regular unannounced food safety and room hygiene audits, accompanied with sampling and testing, across all hotels of the Group. These audits from now on will include certain additional control measures.

As a pioneer and leader in the Mauritian hospitality industry, Beachcomber Resorts & Hotels' is committed to providing its Artisans, Guests, Contractors and Visitors with a Safe and Healthy Environment. This is clearly set out in the Company's Safety & Health Policy and part of our numerous safety protocols and procedures with comprehensive monitoring analysis by trusted agencies like SGS, QuantiLab and LIBA. The Group is taking a major new step in terms of safety and health requirements with the **SAFE PLACE** label. The aim is to better reassure guests and Artisans alike of all health, hygiene, safety and environmental requirements in place while meeting changing needs, especially against the backdrop of the COVID-19 health crisis.

The **SAFE PLACE** label showcases strict safety, hygiene and cleanliness standards. This benchmarking programme promotes reinforced practices in all Beachcomber hotels. New measures implemented include: health checks for all hotel Artisans ; the presence of an infirmary within our hotel with a nurse or a doctor on call ; ongoing training programmes on preventive health measures for all our Artisans ; the application of a cleaning and disinfection protocol in line with World Health Organisation (WHO) recommendations, including specific procedures with particular attention to cleaning and disinfection of frequently touched surfaces in rooms coupled with SARS-CoV-2 (COVID-19) PCR tests.

To better reassure guests, Beachcomber Group is also redefining certain aspects of the guest journey. Masks, for instance, are recommended in situations where social distancing cannot be adequately maintained. The layout of the restaurants' tables and chairs will be reviewed to promote adequate social distancing and *à la carte* service will be prioritised over self-service buffets. Furthermore, guests will be required to take a shower before a spa treatment and a limited number of them will be allowed at any one time in our fitness centre studios and classes.

*"Our responsibility as a hotelier is to safeguard the health and wellbeing of our guests and Artisans; this is the case now more than ever with the pandemic. This labelling scheme, developed in conjunction with LIBA, will enable us to welcome our hotel guests and teams in the best of conditions and ensure their health and safety are adequately taken care of. It is clear that health and safety requisites will be of the greatest importance when choosing a hotel and holiday destination in the future. It is therefore important to take the necessary steps to make travellers feel safe and confident,"* says Beachcomber Resorts & Hotels' CEO, Gilbert Espitalier-Noël.

The **SAFE PLACE** certification builds upon a set of health and safety measures that are already in place in the Group's hotels. *"Safety & Health has always been a major concern and requirement for Beachcomber. With this new **SAFE PLACE** label, we are taking another step in meeting enhanced guest expectations in these times of COVID-19 pandemic,"* says the Group's Chief Officer Operational Excellence, Geraldine Koenig. The Group, as part of its risk prevention approach, has implemented over the years a comprehensive safety programme including

HACCP certification for its hotels, annual Legionella Risk Assessments, water sampling and testing, as well as Indoor Air Quality monitoring, coupled with unannounced food safety audits and hygiene checks, whether that be by SGS, QuantiLab and LIBA, and as part of a continual improvement approach.

## **ABOUT BEACHCOMBER**

Beachcomber Resorts & Hotels is the pioneer and long-standing leader of the Mauritian tourism industry. Since the creation of Park Hotel in 1952, a collection of eight resorts have emerged over the years, including the mythical Royal Palm Beachcomber Luxury Mauritius in 1985, which is widely recognised as the industry reference for luxury holidays on the island. The collection of eight resorts offers a choice of accommodation options ranging from rooms and apartments to suites and villas. Each hotel is imbued with its own history and character, embodying an image of discrete luxury.

### **Corporate Social Responsibility – Fondation Espoir Développement Beachcomber**

Fondation Espoir Développement Beachcomber (FED) was established in 1999. Its three main social inclusion programmes are:

1) **Projet Employabilité Jeunes**

This programme offers hospitality training to young school drop-outs.

2) **Beautiful Local Hands**

This project provides assistance and support to local craft producers.

3) **Community projects**

FED has a decentralised structure with regional committees that implement projects reflecting local needs.

### **EarthCheck Certification**

Sustainable development and environmental protection are tangible issues for the Group, which has implemented energy-saving and renewable energy-friendly practices, among others. All Beachcomber hotels have achieved the EarthCheck Benchmarked Silver status for their ongoing commitment to responsible environmental practices.

## **ABOUT LIBA**

**LABORATOIRE INTERNATIONAL DE BIO ANALYSE LTEE (LIBA)** is an ISO 17025 accredited independent, multidisciplinary testing and research laboratory.

LIBA is a Mauritian company that was founded in 2013 following the buyout of an existing laboratory. Drawing on two decades of expertise, it brings together local and international professionals. The company's fields of activity are microbiology, chemistry, serology, parasitology and molecular biology. The laboratory provides specialist support to hotel operators and food and beverage producers who are concerned with food quality and safety and the environment as well as healthcare facilities and health monitoring services.

LIBA has leveraged its recognised technical and scientific capabilities as well as its strong values to rapidly expand through adding audit, training and consulting to its laboratory services in the

food industry. The range of expertise provided covers product development, sensory testing and root-cause analyses of process deviations to help strengthen quality systems and ensure lasting improvements.

The ISO 17025 accreditation and LIBA's interdisciplinary scientific strengths also position the company as an accredited provider for clinical and preclinical testing. Regular studies are conducted with international institutions in the context of research projects to advance healthcare treatment innovations. In these times of health crisis, it is worth noting that LIBA has the required equipment and expertise to contribute to the fight against COVID-19 (PCR and serological tests).

LIBA has now developed into one of the country's most respected laboratories.

*"At LIBA, we are all passionate about our clients' businesses and our ultimate goal is to work towards optimising the quality of life of people in the safest possible environment. We look forward to further developing our existing collaboration with Beachcomber through the creation of the **SAFE PLACE** label,"* says the Managing Director, Noëlle Gourrege.
